DENY ESTIMATE OF UNEMPLOYED

CHICAGO, March 24.—Labor conditions in Chicago are much better than was indicated by the statistics collected by a New York newspaper and published today. That was the general opinion of manufacturers, labor leaders and charity workers when commenting on the figures. They gave it as their opinion that the estimate of 90,000 unemployed in Chicago was too high by 50 per cent, and that the figures of 200,000 for the state of Illinois were even further amiss.

According to the New York estimate there are 1,200,000 idle persons in the country. Experts here were inclined to believe that the total estimate might not be very far off the actual conditions, as there are 27,000,000 persons in the United States engaged in gainful occupations. As the total number of unemployed is less than 5 per cent and the canvass was made at a season of the year when many persons are idle under the most favorable conditions, it was not considered a bad showing.

As to Hearst's official announcement that the national party would not support Roosevelt, Bryan or Governor Johnson of Minnesota, it is now known definitely that the Hearstites are determined first, last and all the time to defeat Bryan at the polls in November, should Bryan be nominated at Denver.

It was stated today by those in Hearst's confidence that, while he would not raise a hand to defeat Bryan's nomination at Denver, he would use every means at his command to prevent Bryan's election.
